Typical Metal Structure Specifications Guide
**LFS AEB - Metal**

Options
- Aluminum tubing sheet metal or standing seam fascia
- Mechanically attached sheet metal top or standard color standing seam cover
- Painted exposed framework at bottom
- Painted mechanically attached bottom
- Galvanized or stainless steel upper support rod assemblies or lower support posts

---

**LFS AC - Metal (closed face)**

Options
- Aluminum tubing sheet metal or standing seam fascia
- Mechanically attached sheet metal top or standard color standing seam cover
- Painted exposed framework at bottom
- Painted mechanically attached bottom
- Galvanized or stainless steel upper support rod assemblies or lower support posts

---

**LFS TR - Metal**

Options
- Mill finish or painted aluminum tubing frame
- 12” or 16” standing seam, corrugated sheet or aluminum sheet metal on slope, sides and trim
- Sheet aluminum box valance
- Standard or custom painted color
- Painted support posts

---

**LFS FL - Metal**

Options
- Aluminum Channel or tubing perimeter: 6”, 8”, 10”, 12” or custom height
- Water Dispersement: sides, front or rear, internal gutter to downspout
- Standard color choices or match any painted color
- Galvanized or stainless steel upper support rod assemblies or lower support posts
LFS GB - Metal

Options
- Mill finish or painted aluminum tubing frame
- 12" or 16" standing seam, corrugated sheet or aluminum sheet metal on slopes, faces and trim
- Sheet metal aluminum box valances
- Standard or custom painted color
- Painted support posts

LFS SLP - Metal

Options
- Mill finish or painted aluminum tubing frame
- 12" or 16" standing seam, corrugated sheet or aluminum sheet metal on slopes and trim
- Standard or custom painted color on slope and trim

LFS FLV - Metal

Options
- Louver spacing and angle
- Rafter spacing
- Aluminum channel or tubing perimeter: 4", 6", 8", 10", 12" or custom height
- Rectangular aluminum bar louvers or air foil shape louvers
- Match any painted color
- Galvanized or stainless steel upper support rod assemblies or lower support posts

LFS CF - Metal

Options
- Custom height mechanically attached aluminum sheet metal fascia
- Waterjet-cut to fit and mechanically attached top and bottom aluminum sheet
- Open top with internal water dispersion scupper and spout
- Internal aluminum tubing bracing for downlighting
- Downlighting fixtures
- Galvanized or stainless steel upper support rod assemblies or lower support posts
